Models: ARGO-1200-xxx

Also known as F4WB & F4WB-MS-HL

Options:

Microwave Sensor (HI/LO) xxx = SEN

Spare Parts:

1330083 LED Driver - 40w Stallion, SP

1330079 LED HL Driver - MLC65C-P8 (SEN version only)

Important:

It is illegal for anyone, except for a licensed electrician to install or maintain this product. Before installation, ensure that the electricity supply has been switched off and isolated. Installation must be carried out in accordance with the relevant Australian and International Standards.

Installation:

The ARGO-1200-xxx can be mounted to or suspended from any solid surface. Please follow the below installation steps:

- Determine the installation method (surface/surface with clips).
- Determine the power entry method.
- Undo the diffuser clips, remove the diffuser and gear tray. Position the batten base in the desired location.
- Mark out the fixing points on the mounting surface.
- If the cable entry is to be via the rear of the body – Drill out a suitable entry-hole in the rear of the batten body (must be suitably sealed after cable entry using a sealant). If the cable entry is via the end of the batten - Install the provided cable gland, or bring in conduit, to the base as required for the intended power access.
Note: Only round cables are to be used with the cable gland for an IP65 seal. Keep cable entry straight and tension free. Ensure all seals are tight.
min. wire diameter 6mm, max. 12mm.
- **For surface mounting** -, there are 2 extrusions/posts at each end of the base. Drill out the desired number of fixing points at each end. **Fixings must only be through the extrusions/mounting posts.**
 - Position the fitting to the mounting surface and mark the mounting holes.
 - Cable/Gland entry to be down if mounting vertically.
 - Drill the mounting holes.
 - Fix the base to the surface with appropriate fixings.
 - Seal any penetrations/fixing points with appropriate sealant.
- **For Surface Mount Clip mounting**, measure/mark spacing (see dimensions below), install stainless steel clips to surface (use appropriate fixings), then snap batten into clips.
- Wire mains power cable, 240V 50Hz, to terminals marked L, N & 
- Set LED Driver Power Output to either Low (2000Lm) or High (4000Lm) (non-MS-HL version only)
- Set Colour Switch to the desired colour (3000K, 4000K, 5700K)
- Attach gear tray to lanyards.
- Reinstall the gear tray.
- Reinstall the diffuser and latch the diffuser clips.

NOTE:

- This luminaire (with reinforced insulation between control/LED terminal and AC Supply) contains non-user replaceable light source – to be replaced (if required) by the manufacturer or his service agent or a similar qualified person.

Dimensions:

Driver Setting:

(non-SEN version only)

HIGH (4000Lm)

LOW (2000Lm)

Colour Setting:

3000K 4000K 5700K

Gear Tray Clip:

UNLOCKED

LOCKED

Trouble Shooting:

Below are a list of common problems and their possible causes.

Fault: The LED Strip is not illuminated.

Check: A.C. is connected and is turned on.

Wiring connections between the LED Driver & LED Strips
